PROFESSIONAL SUMMARY

DevOps and DevSecOps engineer focused on Kubernetes automation, CI/CD pipelines, cloud-native infrastructure, and security-driven operational workflows. Experienced with AWS, Docker, Terraform, GitHub Actions, ArgoCD, Prometheus, and Grafana. Built production-style projects involving GitOps, observability, container security, AI-driven anomaly detection, and automated infrastructure remediation.

TECHNICAL SKILLS

DevOps & Cloud: Kubernetes, Docker, Terraform, AWS, GitHub Actions, ArgoCD, CI/CD, Linux, Bash, Infrastructure as Code (IaC), GitOps

Monitoring & Observability: Prometheus, Grafana, CloudWatch, Alertmanager, Logging, Metrics, Incident Monitoring

Security & DevSecOps: Trivy, CodeQL, IAM, Container Security, RBAC, Vulnerability Scanning, Shift-Left Security, Cloud Security

Programming: Python, FastAPI, REST APIs, Pandas, NumPy

Tools & Platforms: Kafka, Podman, Ansible, Docker Compose, Git

EXPERIENCE

Al-Nafi International College

May 2024 – May 2025

DevOps & AI Operations Intern (Remote)

Karachi, Pakistan

- Built and managed containerized environments using Docker and Podman across Linux-based systems and Kubernetes workloads
- Developed Python automation scripts and CLI utilities to streamline infrastructure and operational tasks
- Worked with Kubernetes deployments, troubleshooting, networking, and monitoring in simulated production-style environments
- Implemented monitoring and logging workflows to improve infrastructure observability and incident debugging
- Applied networking and security concepts including firewall configuration, secure file transfer, and intrusion detection systems

PROJECTS

Self-Healing AI-Driven Kubernetes Platform | *Kubernetes, ArgoCD, Prometheus, Grafana, FastAPI*

- Built an AIOps platform capable of detecting infrastructure anomalies and triggering automated remediation in Kubernetes clusters
 - Implemented GitOps workflows using ArgoCD for automated deployments and Kubernetes configuration synchronization
 - Developed ML-based anomaly detection services using Isolation Forest models for real-time telemetry analysis
 - Integrated Prometheus, Alertmanager, and Grafana for monitoring, alerting, and infrastructure observability
 - Automated CI/CD pipelines using GitHub Actions to build, deploy, and update Kubernetes workloads dynamically
- [GitHub Repo](#)

Cloud-Native DevSecOps CI/CD Pipeline | *AWS EC2, Docker, GitHub Actions, CloudWatch*

- Designed and deployed a secure CI/CD pipeline for containerized applications on AWS EC2 with automated deployments
 - Integrated CodeQL and Trivy scanning to enforce shift-left security and container vulnerability detection
 - Implemented hardened Docker runtime configurations using non-root containers and read-only filesystems
 - Built centralized observability pipelines using CloudWatch dashboards, alarms, and structured application logging
- [GitHub Repo](#)

AI-Powered Cloud Security & IAM Analyzer | *AWS, Terraform, Python, DevSecOps*

- Engineered a cloud security analysis platform to detect IAM and S3 misconfigurations using rule-based analysis
 - Built IAM risk detection workflows identifying wildcard permissions and privilege escalation paths
 - Implemented CloudTrail-driven least privilege analysis to derive minimal IAM permissions from API usage logs
 - Integrated automated Terraform remediation generation for secure infrastructure fixes
- [GitHub Repo](#)

EDUCATION

Al-Nafi International College

May 2024 – Dec 2025

EduQual RQF Level 6 - Bachelor's (Hons), Artificial Intelligence Operations

Karachi, Pakistan

Beacon Light Academy

Aug 2020 – Jun 2022

Edexcel A-Levels in Information Technology

Karachi, Pakistan
